Information from the brand

# SIEMENS

**Free-standing fridge-freezer  
with freezer at bottom  
KG39NAIAT**

- Energy efficiency class A: save energy with the most efficient appliances.
- hyperFresh – More space for fruit and vegetables. Dedicated storage for fish and meat.
- Metal backwall with multiAirflow system – Evenly chilled food and drinks on all levels.
- bottleCooler – Chills and stores your bottled drinks to perfection.
- freezerLight – Brilliant lighting inside your freezer.
- Bottom freezer with hyperFresh to keep fruit and vegetables fresh for longer, plus noFrost for no more defrosting – enjoy outstanding cooling results in the best energy efficiency and noise level class A.

**More space and more freshness**

<https://www.johnlewis.com/siemens-iq500-kg39naiat-freestanding-70-30-fridge-freezer-stainless-steel/p111921009>

~~more space and more freshness.~~

Get the space you need to store large quantities of fruit and vegetables. And for your meat and fish, there's a separate compartment with its own cold-air supply that keeps food in top condition for longer. More space and ideal storage in one system.

### Evenly chilled food on all levels.

Are some places inside your fridge cooler than others? Our metal backwall with the multiAirflow system solves the problem. The system circulates air evenly inside the fridge compartment, for a constant temperature on all levels. When you place items inside your fridge, they're chilled quickly, and your food's freshness is preserved.

### Clean less: antiFingerprint.

The high-quality stainless steel surfaces of the refrigerator doors are finished with a special coating: The antiFingerprint coating puts an end to bothersome fingerprints on the stainless steel.

### Better bottle storage.

Bottles need their own storage solution and our bottleRack delivers. Store large and small bottles and cans without them rattling inside your fridge. The snug, individual containers keep your bottles within easy reach but tucked away safely.

## Stable temperature: superCooling.

You can use the superCooling button to quickly reduce the temperature in the refrigerator to +2 °C. This prevents an undesirable rise in the temperature of your already chilled food whenever you add food that is not as cold.

## Ensures even cooling at all levels: the multiAirflow system.

The multiAirflow system circulates the air evenly in the refrigerator compartment for constant temperatures. Foods recently placed inside are cooled faster. And the fresh food quality is preserved better.

## Shatterproof and easy to clean - the safetyGlass shelves

All glass shelves are made from extra strong, easy-to-clean safety glass. If something tips over, the spillage is contained and does not spill into the rest of the refrigerator compartment.

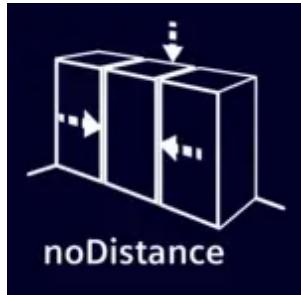

## Stable performance, reduced noise and energy consumption with the Intelligent Inverter Compressor.

Intelligent Inverter Compressor adjusts the refrigerator's temperature in accordance with the inside and outside temperature conditions. It consistently runs at the optimal speed to keep the food at optimal temperature and deliver stable and efficient performance.

## Perfect fit - everytime

Place your fridge directly against the wall, no ventilation gap required.

## LED lighting

### Easily see what's in your fridge.

Thanks to flush-mounted LED lighting, the interior of your fridge is evenly lit so you can easily check what's inside. Since the lights are cleverly mounted at the front of the fridge, your fridge contents won't dim their brightness. Even better, the LED lights are long-lasting and energy efficient.

## Specifications

### Long description of the product

- Standard door Stainless steel anti-fingerprint
- Fridge freezer

### Performance and Consumption

- EU19\_EEK\_D: A
- Total Volume : 363 l
- Annual Energy Consumption: 104 kWh/a
- EU19\_Fast freezer facility\_D

- Noise Level : 29 dB , EU19\_Noise emission class\_D: A

## Functions

- Stainless steel anti-fingerprint doors and Pearl grey (VZF 07127) side panels
- vertical door handle
- LED fridge light with Soft Start in fridge section
- Metal backwall

## Design features

### Freshness System

- coolBox - extra cold fridge drawer. Ideal to store meat and fish.
- 1 hyperFresh box with integrated humidity control

### Food freshness system

- Net Freezer Volume : 103 l
- Freezing capacity 24h : 11 kg
- Temperature rise time : EU19\_Temperature rise time\_D: 21 H
- 3 freezer drawers

## Dimension and installation

### Key features - Fridge section

- Right hinged door, door reversible
- Height adjustable front feet
- 220 - 240 V
- Climate Class: SN-T
- Length of power cord: 210 cm

### Key features - Freezer section

- 2 x ice cube tray

### Country Specific Options

- Based on the results of the standard 24-hour test. Actual consumption depends on usage/position of the appliance.

## Additional features

5 year warranty\* Parts and labour

Ideal for those who want to cut down on time spent food shopping, this 363L fridge freezer from Siemens is packed full of clever cooling and freezing technology that'll keep food fresher for longer. Designed with frost free technology and various storage options, it's a great size for anyone who wants to get creative in the kitchen.

### More room for your groceries

You won't have a problem fitting your groceries into the KG39NAIAT. The fridge has a capacity of 260L, a salad crisper drawer that'll keep your fruit and veg fresh and tasty and five shelves to store chilled favourites. The 103L freezer also offers three drawers to accommodate your frozen goods, with clear front panels to make checking on your food easy.

### Fast Freeze protects frozen loads

Your frozen items are always protected too, as the handy fast freeze function rapidly freezes your groceries as soon as you pop them in the drawers – so say goodbye to melted ice cream when you return from the supermarket.

### Reliable shelving with safety glass

The freezer's sturdy shelving is made with safety glass, which is less likely to break compared to normal glass. And because of its smooth surface, accidental spillages can easily be wiped away in an instant.

### Chrome wire rack large enough for five bottles

Enjoy a convenient storage space for your bottles thanks to the chrome wire wine rack in the fridge. It can store up to five bottles, so you'll have extra space on your fridge shelves to store more of your everyday groceries.

### Reversible door hinge optimises space

A reversible door gives you extra flexibility when planning the layout of your kitchen, as you're not restricted on where you place the refrigerator in your home.

### First class appliance

Love this fridge freezer. Super quiet, huge, loads of space and great ideas for storage. I bought the Ethylene absorber to put in the fruit and veg drawer, and it does work, the fresh produce does last

a lot longer. I'd highly recommend this appliance just make sure you have enough room for it as its over 6ft tall. Well worth the money..

### **Excellent Product**

This product was purchased as our older unit leaked thawing ice. Chosen because it has a category A energy reading, it has proved excellent in service. It is completely silent and stores more food and drink in the fridge, chilled and freezer sections than our previous similar-sized unit. These are also easier to access when required. A nice touch is the inside light showing outside for a few seconds after the door is closed. The robust door handles are very useful for 'more mature' people like us to cope with. In the five weeks or so we have had it, we cannot fault anything. It looks very smart and is easy to wipe over, both inside and out.

As is usual with John Lewis products, it was delivered on time without any fuss, whilst the old unit was taken away at the same time, together with the packaging.

### **Not cheap but a great product**

I am really delighted with this fridge freezer.

There is a large fruit/vegetable drawer along this a smaller zero degree drawer for meat.

There are 4 shelves and a horizontal bottle rack for 5 bottles.

There is plenty of storage in the door

The freezer and fridge temperatures can be set separately which was great as in my previous F/F the freezer was much too cold.

There is a display showing the temperature chosen for each compartment and I checked this using a digital thermometer and they were both spot on.

There is an alarm if the doors are left open but to be honest if the doors are left slightly ajar then they close themselves anyway so I am not sure this is needed

Its nearly silent when operating.

Finally it has a proper grabbable handle rather than a groove in the side of the doors which appealed to me.

It came with an additional 3 year warranty by registering with Siemens and at the time I bought it

there was an additional cashback.

In summary it wasn't cheap but I couldn't be happier

### Report

**Energy efficient, Very quiet, Accurate temperature control.**

This is an energy efficient fridge freezer.

Fridge section.

The hyper fresh fish and meat and vegetable areas work well and do seem to keep food fresh for longer but at the cost of space at the bottom of the fridge section.

Internal lighting is good

Very quiet in operation.

The door bottle storage area is quite high and may be difficult for some.

This is a tall fridge freezer and some may find it a reach to reach items in the top at the back.

You can customise the size of storage areas by the position of the shelves and wire bottle rack but to make storage for large items one shelf was removed. Also depending on where you locate the shelves the spacing between shelves can be quite narrow.

Storage in the door compartments is again adjustable but some locations are not very practical due to limited access. Not keen on the egg trays which seemed a little cheap.

The wire bottle rack works well but is not the most space efficient. There is also a stainless steel book end which can be used to prevent smaller bottles on their side from rolling or moving about.

The temperature displayed is close to the temperature achieved. Measured different set temps in both fridge and freezer to check accuracy.

Internal surfaces are easy to clean.

You get a beeping alarm if open either door open for what it thinks is too long. So if filling the fridge following a big shop expect to close and open the door a couple of times to make it stop.

No issues with condensation.

Freezer Compartment.

Good range of temperatures and selected temperature accurate.

The freezer compartment has three pull out draws which retain prevent loss of cold air when

opening the  
freezer.

Well lit because of its LED lighting.

Fast freeze works well.

General

This appliance has modes such as sabbeth mode which I wlll never use and I suspect this will apply to the majority who set the fridge and freezer temp and then never, if ever, change it. I have used the fast chill fast freeze setting when adding non frozen or chilled items in quantity or after a big shop and this seems to work well.

Easy to level.

Heavy and not easy to move.

I like the stainless fininsh but protect from scratches.

Quality: **Great**

Value: **Good**

## Report

---

Think if this for you? Make smart choices.

It was time to replace my fridge freezer. I looked at reviews on which, the JL, and other sites and settled on a Siemens iQ500. I looked at physical size and efficency ratings as well as suggested power consumption over a year. Treat these with a pinch of salt and just as a guide. In some cases the energy efficency between an A rated and C rated were a handful of KwH per year. With at a cost per KwH of say 24p an A rated added up to a saving of less than a tenner a year in energy costs. Given the price differential between an A and a C rated can be considerable its worth thinking about. One major consideration for me was how quiet the appliance was. A few Db is a significant diferece. I went for the iQ500 because it was about the same size as my old appliance, was quiet, had a fridge freezer 70/30 split, and it wasrelativly energy efficient. When looking at the split also look at the usable capacity. The type and quantity of insulation impacts usable space dramatically. I have reasonable storage space in the fridge with specific areas for fruit veg meat and fish which are very good. But I find the space is not as usable as you might think. it's difficult to find a home for large items because of the space taken by the fruit and meat fish storage areas. One other point I will note is that the bottle door storage is quite high so may prove difficult for some to lift four or six litres of milk this high. Putting stuff in the top of the fridge at the back would be an issue for shorter people without a step. at 5,11 its a reach. If unsure go to a store and check you can reach all areas. The freezer compartment has the slide in/out compartments good for trapping cold air when accessing one area. This unit is very heavy and needs two strong people to move it. Leveling up with a spirit level was simple with a spanner and the adjustable feet. In operation the unit is quiet and has accurate temperature control close to that indicated. Don't assume its right check with a thermometer. I don't need all of the operating modes such as sabbath mode but this is common with a lot of appliances. They have features people just don't need or use. The instruction manual was readable but the single sheet with pictorial do's and dont's was frankly confusing. The pictograms on the installation, set up, door side swap, booklet confusing. On inital switch on it took a few hours to get down to temperature and there was no

instruction to leave it to stand for 24 hours after moving like the previous unit. I left it over night and it was cooling down nicely. I have not had it long enough to comment on reliability.

**Quiet, economical, flammable refrigerant!**

★★★★★

Warning instruction manual sates risk of EXPLOSION if cooling circuit is damaged. This unit contains FLAMMABLE REFRIGERANT. I did not see this in any product description on the JL or other sites. It may be all fridge freezes now use a similar refrigerant. My existing 15 year old fridge freezer was not holding temperature in the fridge compartment. Based on age, condition and cost for service/repair re-gas it was time to look for a new appliance. I looked at reviews on which, the JL, and other sites and settled on a Siemens iQ500. 3 cm taller than my old appliance. I also looked at efficency ratings and suggested power consumption over a year. treat these with a pinch of salt and just as a guide. In some cases the energy efficency between an A rated and C rated were a handfim of KwH per year. With at a cost per KwH of say 24p an A rated added up to a saving of less than a tenner a year in energy costs. Given the price differential between an A and a C rated can be considerable its worth thinking about. One major consideration for me was how quiet the appliance was. A few Db is a significant diferece. I chose the iQ500 because it was about the same size as my old appliance, did not need bigger, it was quiet, had the right fridge freezer 70/30 split, and relativly energy efficent. When looking at the split also look at the usable capacity. The type and ammount of insulation impacts usable space dramatically. I have plenty of flexible strage space in the fridge with specific areas for fruit veg meat and fish. the one point iI will note is that the large bottle storage if higher then my old one so may prove difficult for the elderly lifting four or six litres of milk this high may be a problem. Putting stuff in the top of the fridge at the back would be an issue for shorter people without a step. If unsure go to a store and check out the height you can comfortable reach up and in. The freezer compartment has the slide in/out compartments good for trapping cold air when accessing one area. I have a chest freezer to so only use the kithchen freezer for regularly used items. Your peas. ice cubes, minced beef, vegi beef, for quick meals. This unit is very heavy and my intentded route into the kitchen though the front door did not work. The JL delivery team tried their best but in the end I had them leave it in the garage for me to move later as it was not going in as envisaged. After a tidy and moving patio plants with the help of a couple of friends we moved it into the kitchen and the old unit back to the garage but this is not a one man shift. its heavy, bulky and care is needed to avoid damage when moving. as a Tip I also added a bit if pipe lagging to the end of the work top against which it sits to prevent any damage and a nearb y door handle. Leveling up with two spirit levees was simple with a spanner and the adjustable feet. You could get away with one spirit level. Measure front to back, left to right. The unit was well packaged and the JL team took away the external packaging. I delt with the internal. Not too much polystyrene as I have a small non recycling bin and polystyrene is not recycled in my area. Some produts packaging fill my bin which is emptied every two weeks. Check the dimensions carfully and ensure the appliance you choose will fit through your chosen route. I'm an engineer so should have got this right. I cleard a path but there

was just not enough room to slide and tilt it through even with best endeavours. In operation the unit is quiet and has accurate temperature control close to that indicated. Don't assume its right check with a calibrated thermometer. I don't need all of the operating modes such as sabbath mode but this is common with a lot of appliances. they have features people just don't need or use. the manual mentions travel bolts. I could not find the travel bolts to remove as there was mention but no diagram. I looked carefully for these, perhaps the JL team dewlt with them them when they took the outer packaging. The instruction manual was readable but the single sheet with pictorial do's and dont's was frankly confusing. The pictograms on the installation, set up, door side swap, booklet confusing. On initial switch on it took a few hours to get down to temperature and there was no instruction to leave it to stand for 24 hours after moving like the previous unit. I left it over night and it was cooling down nicely. overall it has good usable space and time will tell how useful. I have not had it long enough to comment on reliability. Dropped a star due to the flamable coolant awareness and poor pictorial instructions. written manual ok.
